

Cytec's MP4 reference solution

Base on Sigmatel 3638

Introduction of Solution

- A solution of STMP3638 + STFM1000 + 2.4" TFT display + SD card slot.
- Complete firmware based on SDK4.420RTM plus graphical UI.
- User is allowed to change the key configuration, TFT display driver, and opening logo display to work out a production ready firmware.
- You could do the PCB layout according to our reference schematic.

Basic functions of Solution

- Support MSC/MTP mode.
- Standard Graphical UI with multi-language support.
 - English, Simplified Chinese, Traditional Chinese, Korean,.....
- Application includes:
 - Music
 - FM radio
 - Video playback
 - Photo
 - Recording
 - E-book
 - Clock/Alarm
 - Calendar
 - Folder browsing
 - Game (Tetris only)

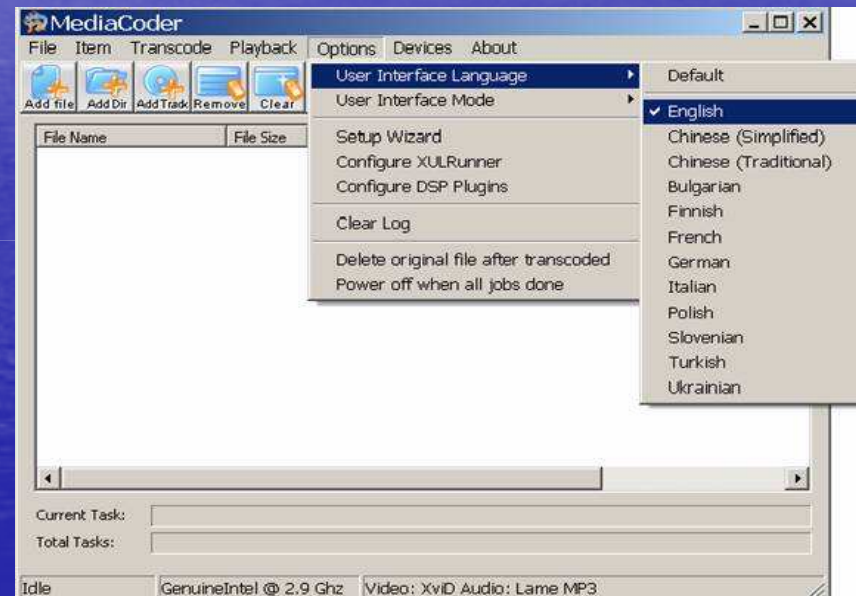

Supporting formats.

- Music:
 - Support MP3, WMA, AAC, OGG, ADPCM, PCM decoding.
- Video:
 - QVGA 320x240 resolution, WMV(SP)@15fps, MPEG4(SP)@20fps.
- Recording:
 - Support line-in, mic-in, FM record.
 - Support MP3, ADPCM, PCM audio encoding.
- Photo:
 - BMP, CIF, JPEG with scaling.
- E-book:
 - Text file *.txt

Media Coder

- Allow user to convert different video file formats into a STMP3638/50 acceptable video format.
- To maximize STMP3638 Turnkey solution video performance.
- To avoid compatibility problem due to different video file formats.

PCB and casing
