## Automotive Market Trends

Driving Automotive Semiconductor into a Greener, Safety Oriented Future

**Jerwern Yi (易生海)**

Automotive Marketing Manager, China

# Technology that changes our world

- ▶ \$5.7B Revenues (2007)
  - 30% automotive
  - No. 1 in automotive semiconductors supplier since more than 20 years
- ▶ Over \$1.2B investment in research

- #1** in total auto ICs
- #1** in auto microcontrollers
- #2** in MEMS sensors

# Freescale Leadership Products and Technologies

## ▶ Microcontrollers

- Market-leading architectures (Power Architecture™, S12, S08) covering the performance spectrum
- Industry-leading flash technology
- Strong tool and software ecosystem

## ▶ Sensors

- More than 25 years of experience designing and manufacturing automotive-grade MEMS
- Leadership integration capability, with analog and MCUs

## ▶ Analog

- Highly efficient integration of power, analog and digital on single chip or SiP utilizing SMARTMOS™ technology
- Global design capability for automotive analog and power
- Rich library of automotive analog IP

# Global Automotive Relationships

 <h2>Americas</h2>        	<h2>EMEA</h2>            
 <h2>Japan</h2>       	<h2>Asia</h2>         

# Automotive Electronic Content Growth

Sources: Bosch, PSA, Freescale Strategy

# Automotive Electronic System Trends

## Going Green

- Stringent emissions regulation
- Hybrids, gasoline direct injection
- Electronics replacing hydraulics

## Safety

- Active safety systems proliferating
- Intelligence driving performance
- Higher standards of reliability required

## Connectivity/ Infotainment

- “Standard” convenience features
- Wireless inside and out
- Regulations: Telematics/eCall systems may become mandatory

## The Affordable Vehicle

- 30M cars in emerging markets by 2009
- Ultra-low-cost vehicles

\*source: IMS Research

## Green , Emissions Reduction

Source: IEA

# Environmental regulations around the world

**Europe:**  
**120g CO<sub>2</sub>/km**  
**by 2012**  
**95g CO<sub>2</sub>/km**  
**by 2020**  
 European Commission  
 Jan. 10, 2007

**Japan:**  
**16,8 km/l**  
**by 2015**  
 Council for transport  
 Policy  
 February 2007

**USA:**  
**35 MPG**  
**by 2020**  
 Senate Bill  
 June 21, 07

# Automotive industry going “green”

Going **Green**

- ▶ **Drive for fuel efficiency: \$4 per gallon gasoline in US, \$10 in Western Europe**
- ▶ **Environmental / green — regulation**
  - US NHTSA target to improve CAFE standards by 40% in 2020
    - Increase CAFE from 25 mpg to 35 mpg (CO2 reduction from 219g/km to 156 g/km)
  - EU target to reduce CO2 emissions by 2012 to 120g/km
  - Emerging market likely to adopt European emission standards
- ▶ **Sustainable solutions must be found to reduce the amount of fuel consumed**
  - Hybrid cars gaining significant popularity in the US
  - Diesel + Mild hybrid gaining popularity in Europe
  - Electrical vehicles and combustion range extenders
  - Improved small engine management and ebikes for emerging markets
  - Reduce vehicle weight through more efficient subsystem design, reduction of cabling
- ▶ **Materials used in vehicles must be environmentally friendly**
  - Elimination of hydraulic systems
  - Decreased use of Pb and other potentially harmful chemicals

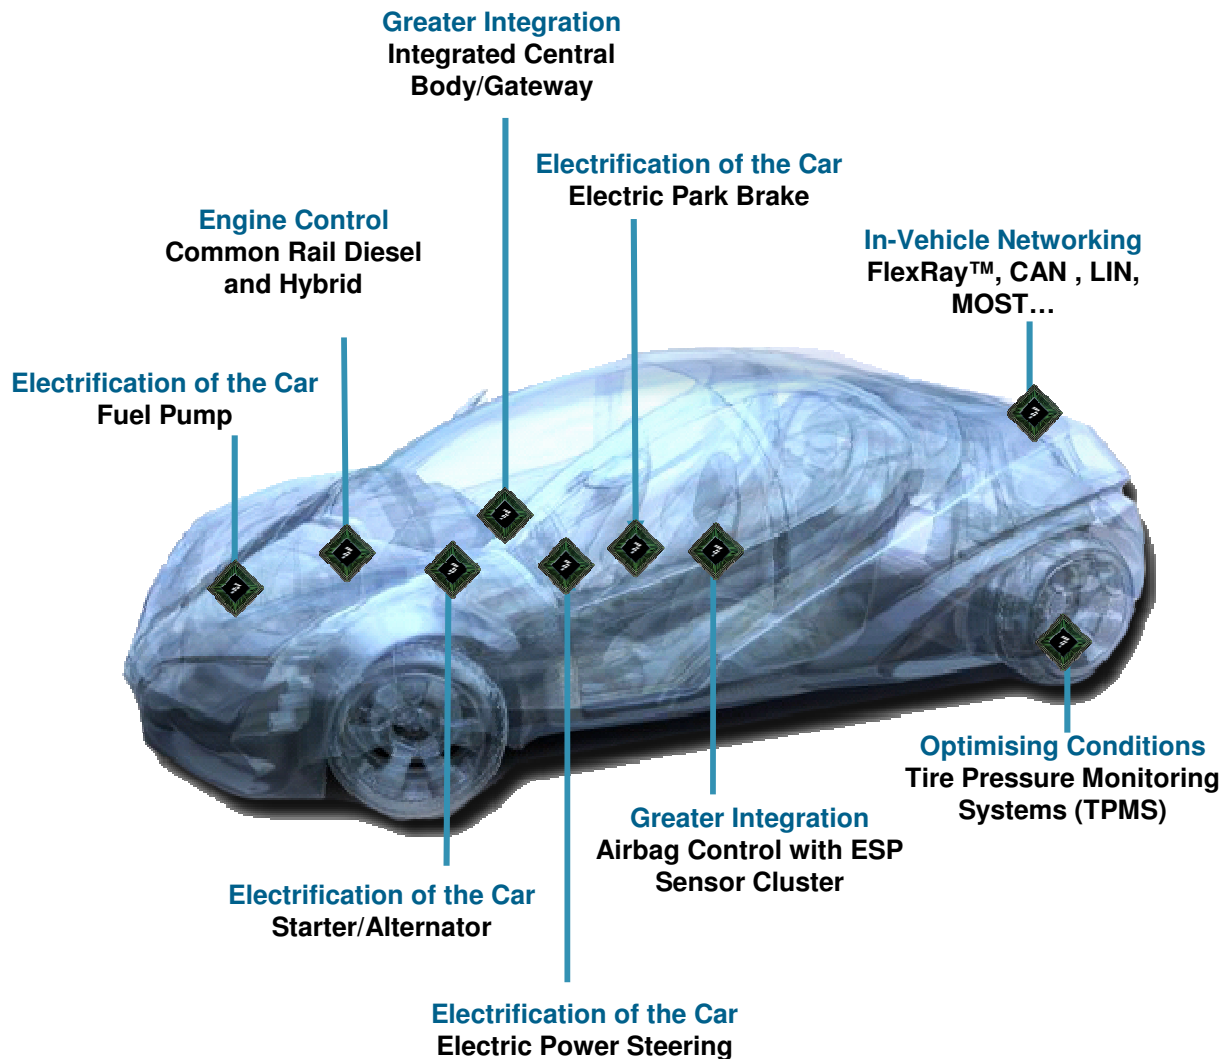

# Engine Efficiency—MPC55xx MCU Solutions

- ▶ 32-bit MCUs built on *Power Architecture™* technology
- ▶ *Dual Core Capability* from eTPU optimises Engine control by providing task partitioning
- ▶ *SIMD DSP* enabled complex computing of the model based combustion algorithms
- ▶ Proven *embedded automotive grade flash* that functions in harsh engine environment
- ▶ MPC55xx *Knock Detect Software* improves fuel economy up to 5%, prolonging engine life
- ▶ Enhanced *ADC performance*, driven by increasing number of sensors and actuators

MPC55x family is the main controller for ~50% of all Powertrain ECUs

# Emissions Reductions Focus Areas

## Weight Reduction

- ▶ *Electrification of the car* reduces weight by replacing Hydraulics, mechanics
- ▶ New *In-Vehicle Networking* techniques means fewer wires, lighter wiring harness
- ▶ *Greater Integration* of features means less modules, with less wires

## Energy Efficiency

- ▶ More efficient *Engine Control* technology such as Common Rail Diesel and Hybrid Engines
- ▶ *Optimising Conditions* by alerting the driver to potential problems, i.e. TPMS

# Electrification of the Car

## ► Electric Power Steering (EPS)

- Replacing hydraulics results in weight reduction
- Freescale offers Power Architecture™ based 32-bit chassis MCUs, MC3370 power supply and MC33927 3-Phase Motor Pre-driver

## ► Electric Park Brake

- Reduction of mechanical components results in weight reduction
- Freescale offers S12X 16-bit MCU for DC motor control, with MMA2260EG and MMA1260EG low G sensors for tilt measurement

## ► Starter Alternator

- Electric motors help move the vehicle, provide stop/start capability, improving fuel efficiency especially when idle
- Freescale offers 32-bit chassis MCUs built on Power Architecture™ technology for motor control functionality

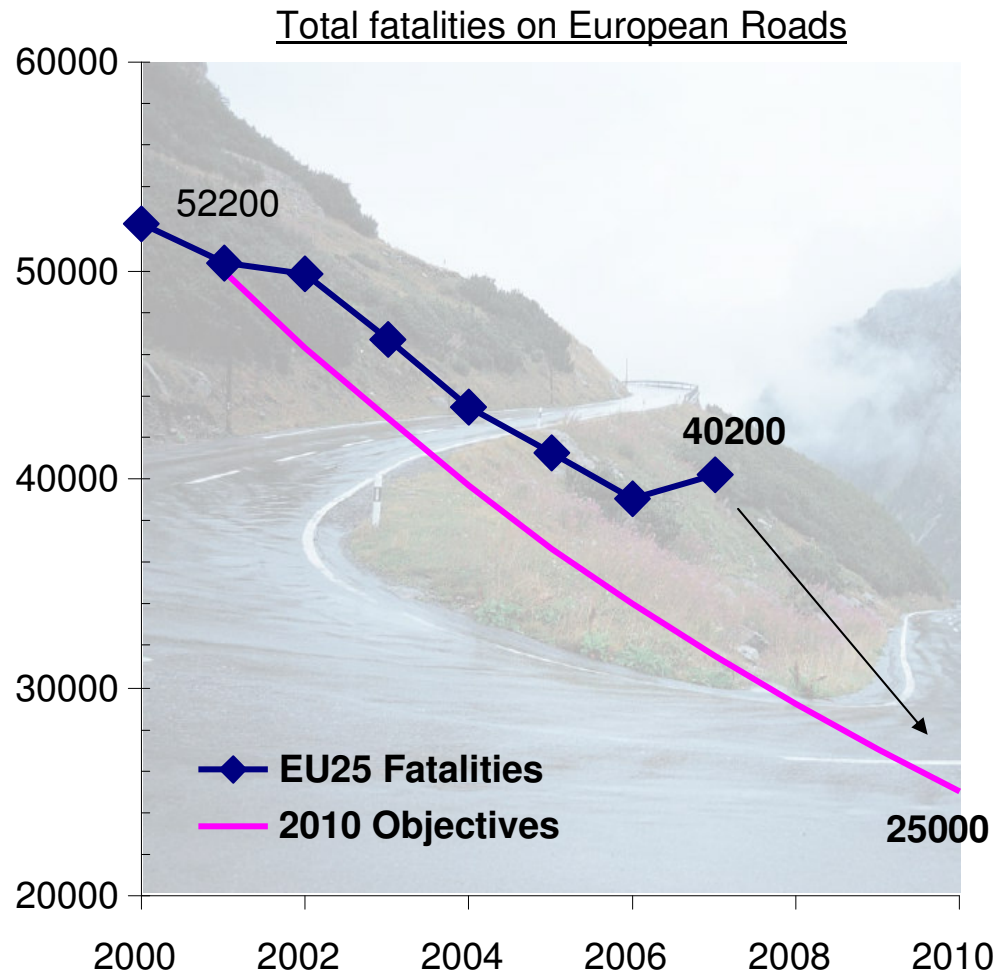

## Safety

**“The best car safety device  
is a rear-view mirror  
with a cop in it”**

Dudley Moore (1935-2002)  
English Actor

# Example: Europe

1990: 70900 fatalities  
 2000: 52200 fatalities  
 2007: **40200 fatalities, increasing !**  
 2010: 25000 fatalities (goal)

Road fatalities are costing the European society 2% of GDP

Large difference in death rate per 100k inhabitants across Europe

Sweden	4.9	3x more risk
UK	5.6	
Germany	7.1	
France	9.2	
Italy	9.6	
Czech Republic	13.5	
Poland	15	

Source: EU CARE, EuroNCAP, EuroRAP

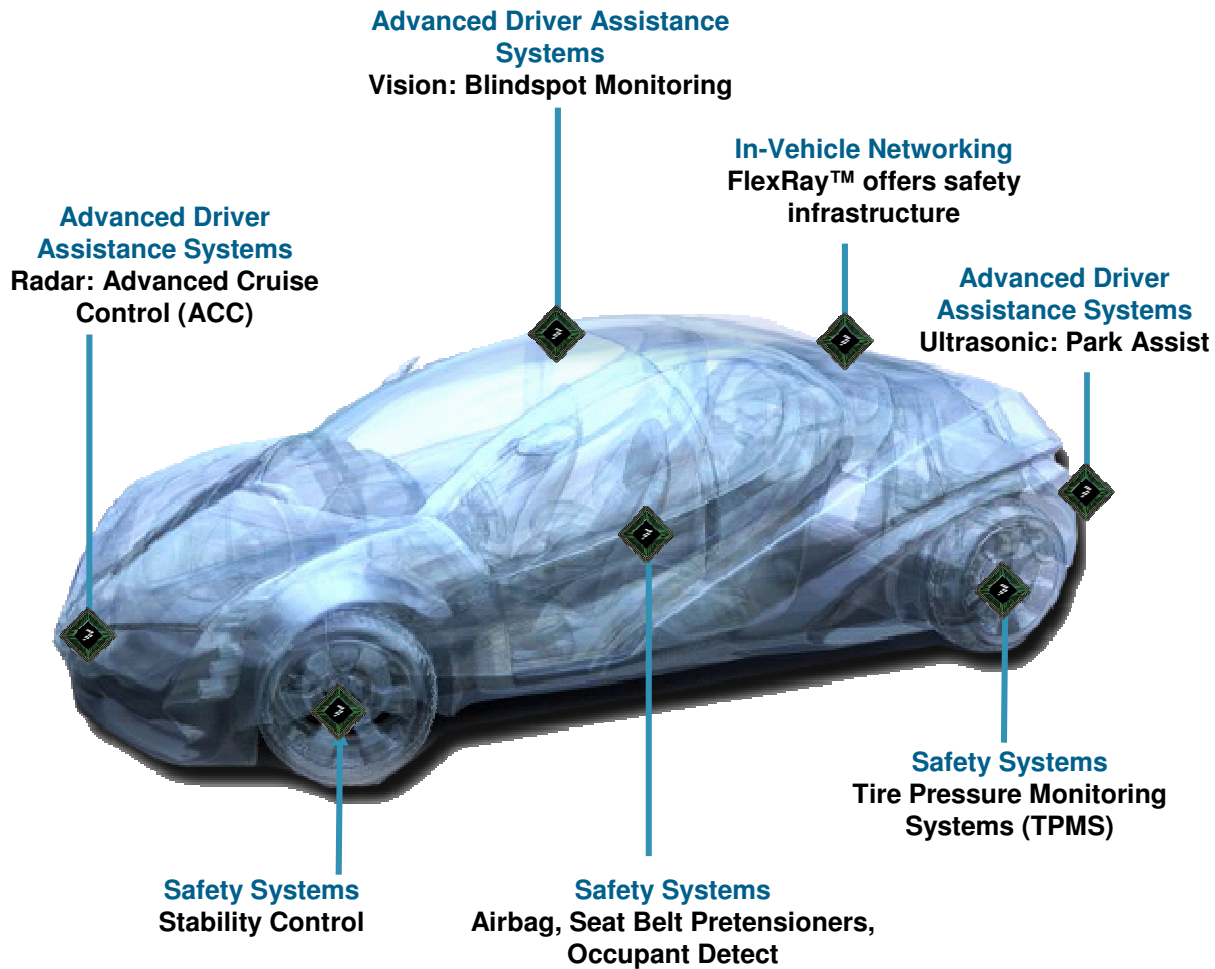

# Automotive Safety Trends

**Health & Safety**

- US NHTSA: ESP mandatory for all cars sold in the US by 2012
- UN proposal to mandate ESP in Europe by 2012
- European E-call expected to be mandatory in Europe by 2010
- Advanced Driver Assistance System to assist aging driver population (Europe, North America, Japan)
- Proven, low-cost safety solutions like airbag and ABS are being implemented quickly in developing regions
- Emerging markets likely to adopt US/European crash test standards
- TPMS is now mandatory in the US
- Pedestrian protection now mandated in Europe
- Higher standards of reliability required
- Open industry standards and collaboration

# Safety Focus Areas

## Safety Applications

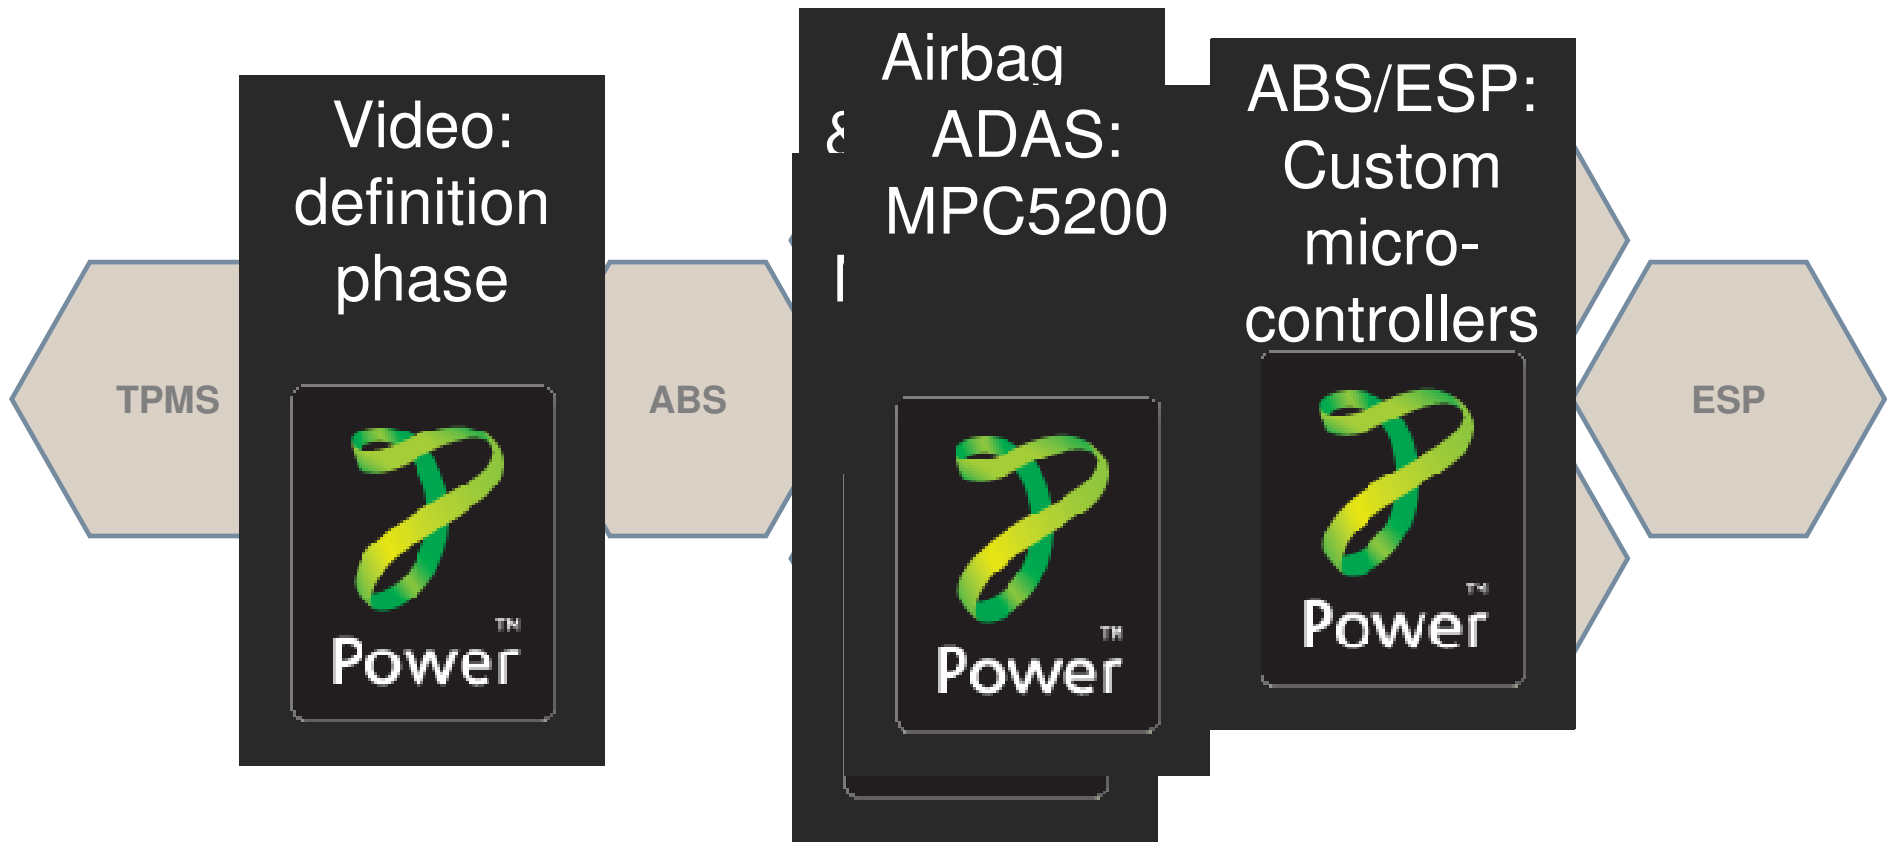

- ▶ Many *Safety systems* such as Airbag, TPMS and ESP are heavily legislated
- ▶ *Advanced Driver Assistance Systems* are a growth area using Ultrasonic, vision and radar technology

## Market Trends

- ▶ Safety critical applications are being developed with *Functional Safety* certification in mind such as IEC61508 SIL3 compliance
- ▶ FlexRay *In-Vehicle Networking* provides additional infrastructure for safety systems

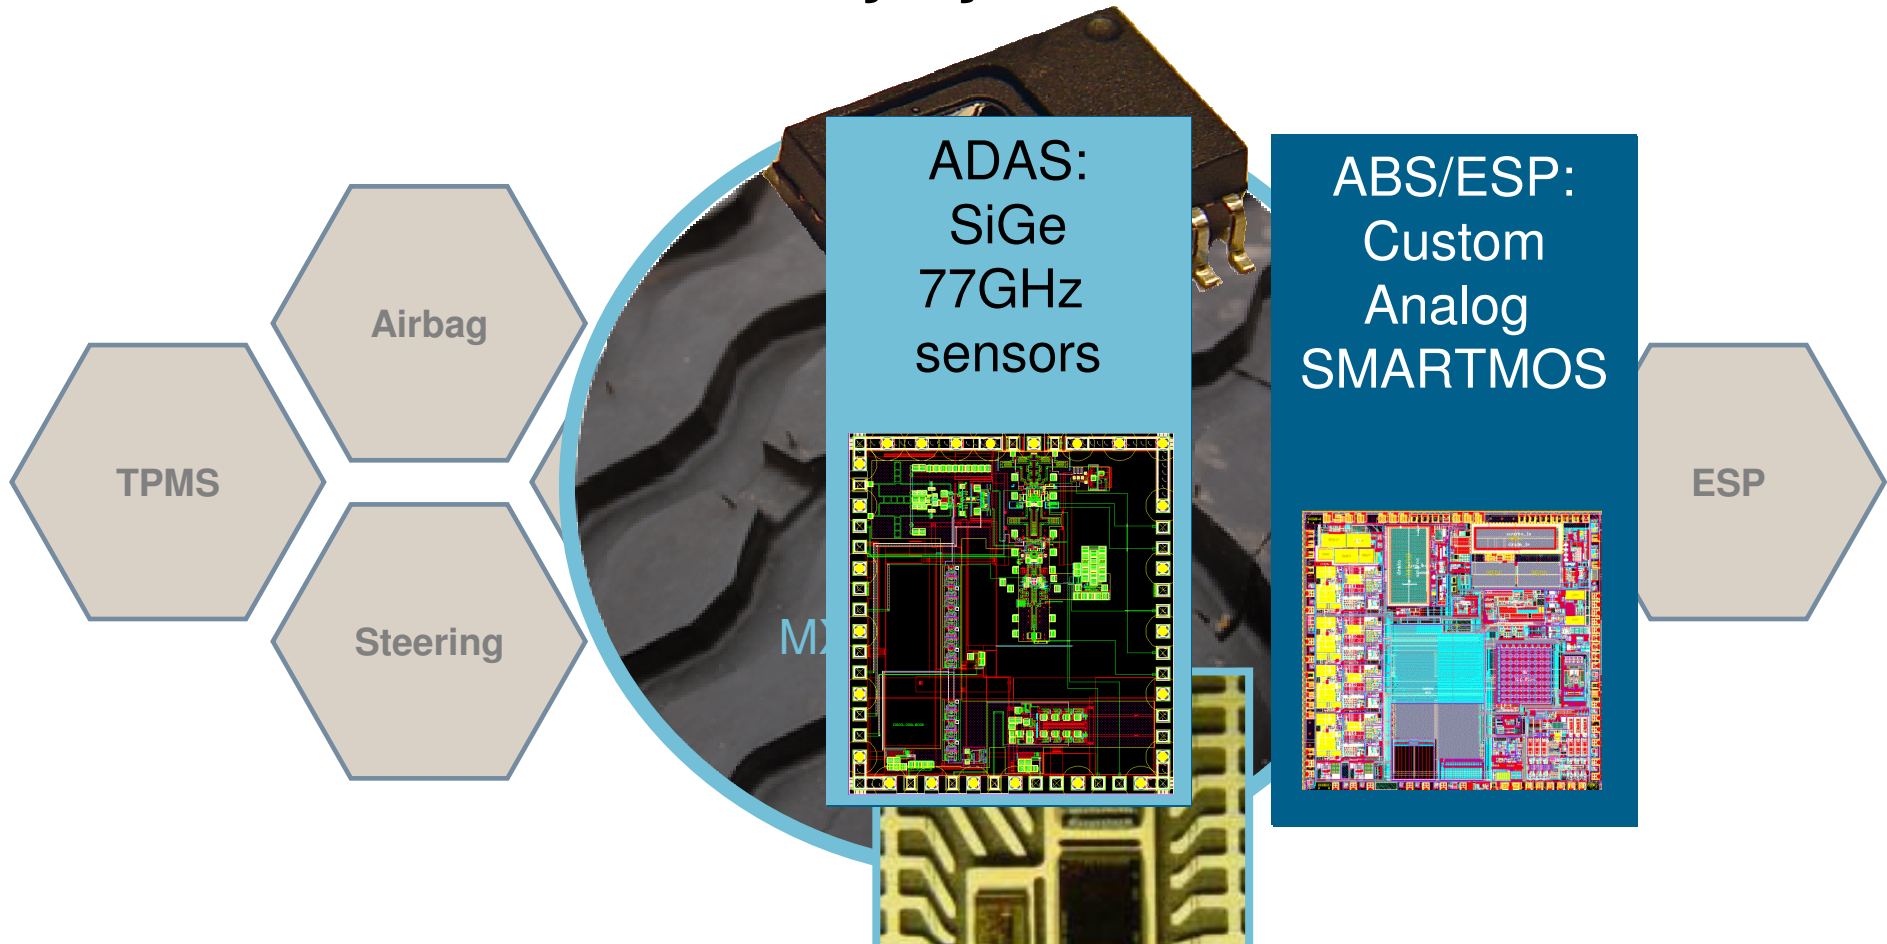

# Automotive Safety Systems & Freescale Solutions

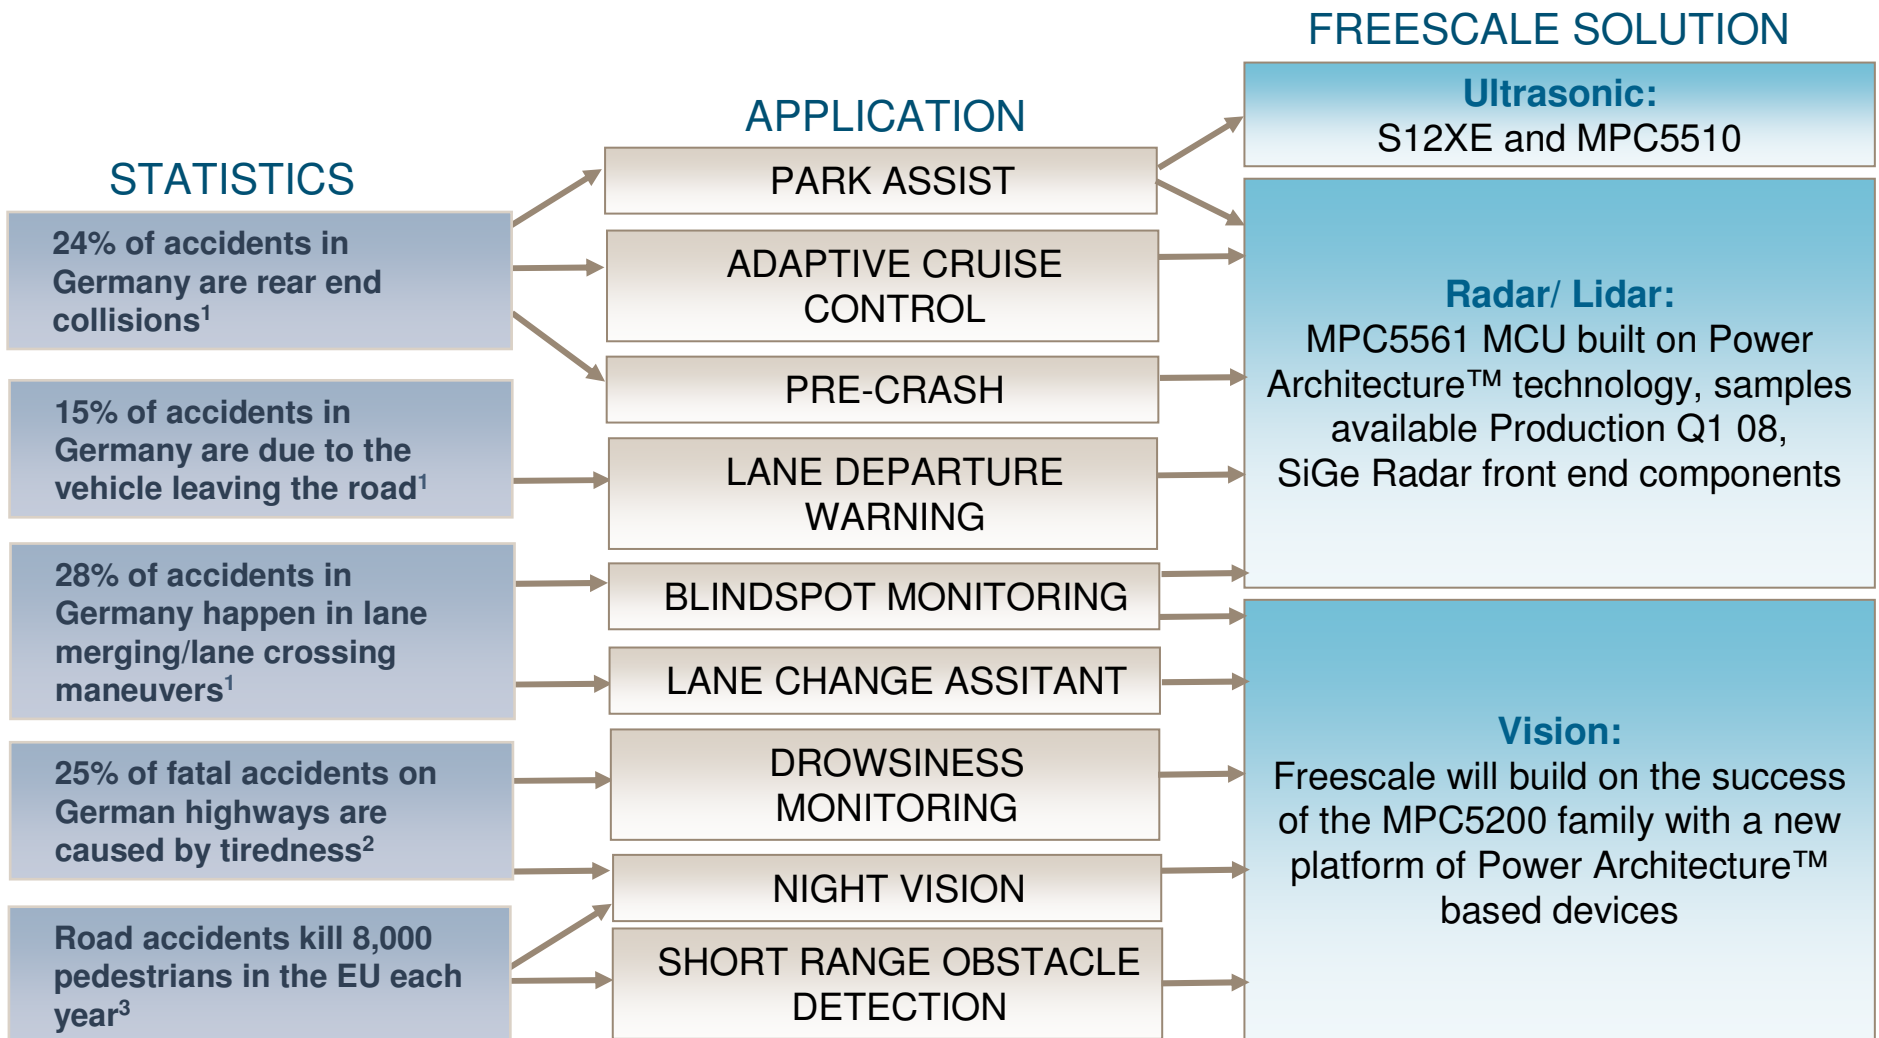

32-bit Power Architecture Technology is playing a dominant role in automotive safety applications.

# Automotive Safety Systems & Freescale Solutions

Our microcontroller portfolio and our system-level competence is greatly supported by our custom & standard analog and sensor products.

# Advanced Driver Assistance Systems

1)INVENT-FAS 2) German Insurance Association (GDV) 3) UN ECE

# Sensors for Automotive Safety Systems

## ▶ Airbag Modules

- Accelerometer two-chip solution for greater design flexibility
- Integrated satellite sensor solutions
- HARMEMS next-generation technology

## ▶ Radar Systems

- Accident avoidance
- Blind spot detection
- Lane departure warning

## ▶ Tire Pressure Monitoring Systems (TPMS)

- Improves vehicle safety
- Precise direct tire pressure measurement
- Fully integrated device in single package

## ▶ Vehicle Dynamic Control

- Improves stability
- Detects driver's control inputs and actual response of the vehicle
- Provides overall control and monitoring of chassis systems

## Summary, Key messages

# Investment for the Future

## ► Advanced Safety

- High-performance Power Architecture™ solutions for radar and vision systems
- Pioneer in FlexRay™ technology for by-wire systems
- Gyro and low-g sensors for vehicle dynamics
- 77 GHz RF solutions for radar
- Cost reduced components for emerging markets

## ► Green Technologies

- Multi-core Power Architecture processors for next-generation powertrain (GDI, hybrids)
- Intelligent power switching and communication solutions to replace hydraulic systems
- Cost reduced components for emerging markets

## ► Infotainment

- mobileGT™ alliance of third-party software providers for Power Architecture solutions
- i.MX application processors for advanced multimedia
- Symphony audio DSPs for radio head units, external amplifiers and aftermarket audio solutions
- Cost reduced components for in car networking applications

## Sustainable Mobility.

- **Reduce** emissions and fuel consumption of personal cars

AND

- **Change** habits and shift to collective transportation means

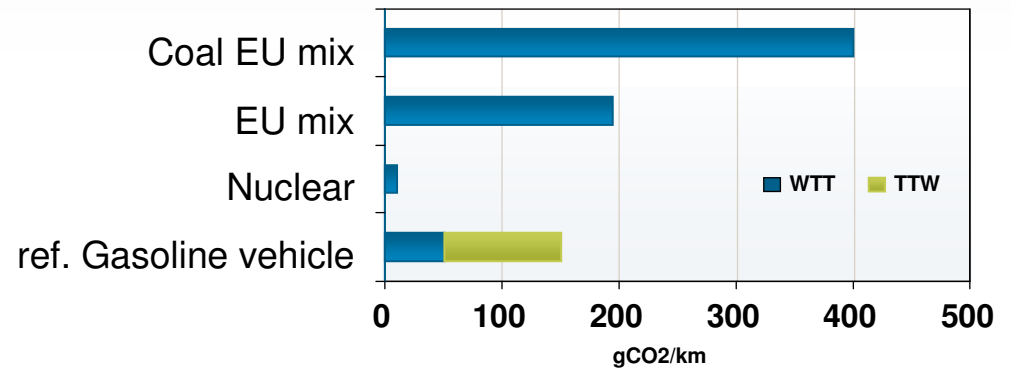

Source: ADEME

# More Electric Cars?

- Well to tank **efficiency** and emissions
- **Refueling** time & business model
- Finding the right **economic balance**
- Going the **extra kilometer**

### Electricity in transportation

### Battery diversity

## Toward More Advanced **Driver Assistance?**

- In large cities, it is estimated that **20%** of the cars are only looking for a place to park (*ATEC-ITS*)
- Using “**eco-routes**” is estimated to save **16** to **19%** (*Carwings – Nissan*)
- People trained on “**eco-driving**” are consuming on average **11.7%** less (*eco-driving Europe*)
- More Telematics
  - Communication of information, reservation, toll...
  - Traffic information, navigation, parking, ...

# Key Enabling Technologies: Semiconductors and Electronics

- Whatever energy, the objective is to **reduce the consumption**
- Powertrain **optimization**
  - Increase the Engine efficiency
  - Minimize the energy losses by a well-defined energy management
- **Reduction** of the vehicle weight
  - Wires are the 2nd heaviest component
  - Reduce length & thickness
- **Replacement** of mechanical & hydraulic elements
  - Powered as required
  - Steering and Braking by Wire

High  
Computing  
Power

Efficient analog  
& Smart  
Actuators

Deterministic  
Multiplexed  
networking

Environment  
& Behavior  
Sensors

The **world's leading**  
automotive
